

TELIC

Holographic Blanks

Substrates

- Soda Lime, Black Soda Lime
- Borosilicate (Eagle, D263, AF32, Borofloat)
- White Crown (B-270, BK-7)
- Quartz (Synthetic Fused Silica)

Applications

- Holographic Mastering

SUBSTRATE SPECIFICATIONS

SIZES: Square or Rectangular Shapes up to 50" or 1270mm

THICKNESS: 00.020" - 0.220" (0.5mm - 6mm)

non standard thickness is available upon request

SURFACE: All plates are polished on both sides and inspected to be free of glass defects > 5 microns

FLATNESS: <15 microns / 100mm x 100mm

PHOTORESIST SPECIFICATIONS

TYPE: AZ1500 Photoresist Standard Thickness Available 5300Å, 1 micron, 1.5 microns, 2.5 micron.

THICKNESS/OPTICAL DENSITY: 1.0 and 1.5 micron, up to 20 micron available.
